

Screenshot of a browser window showing the GitHub homepage and an open developer tools panel.

The GitHub homepage displays:

- A search bar with placeholder "Find a repository..."
- A list of repositories:
 - zefiruz/frontend-and-backend-practice
 - zefiruz/my-awesome-project
 - zefiruz/frontend-and-backend-practice_new
 - Sashurman-K/kurs2
 - zefiruz/kurs
 - grachevveloper/study-industrialDb_2025
- A "Feed" section showing a follow notification from "grachevveloper" and a profile card for "Nick Grachev".

The developer tools panel on the right shows the Lighthouse audit results for https://github.com/:

- Accessibility**: Score 97/100. A green circle indicates no critical issues. The audit notes: "These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged."
- BEST PRACTICES**: One issue found: "Touch targets do not have sufficient size or spacing."
- ADDITIONAL ITEMS TO MANUALLY CHECK (10)**: A list of items to review, with a "Show" link at the end.

The system tray at the bottom shows weather (2°C, cloudy), a search bar, and system icons.
