

Screenshot of a web browser showing the Love PDF website (<https://lovepdf.ru/png-to-pdf>) and the Lighthouse accessibility audit results.

The browser toolbar includes various icons for search, file operations, and extensions. The address bar shows the URL and the title "Конвертируйте из PNG в PDF - Love PDF". The tab bar lists several open tabs, including Gmail, Яндекс Почта, YouTube, Яндекс Карты, Google, ChatGPT, DeepSeek, and Яндекс Музыка.

The main content area displays the Love PDF interface for converting PNG files to PDF. It features a large red button labeled "Загрузите PNG файлы" (Upload PNG files). Below it, a section titled "Конвертируем файлы PNG в PDF" (Converting files PNG to PDF) provides instructions on how to use the service.

The Lighthouse audit results are shown on the right side of the screen. A summary card indicates 74 issues found, with a large orange circle containing the number 74. The category "Accessibility" is highlighted, showing 7 issues:

- Buttons do not have an accessible name
- Links do not have a discernible name

A note states: "These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged."

The "Names and Labels" section lists two issues:

- Buttons do not have an accessible name
- Links do not have a discernible name

A note below says: "These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader."

The "Console" tab in the developer tools shows a single log entry:

```
Replace Callback has been called
GET https://yandex.ru/ads/system/context.js net::ERR_BLOCKED_BY_CLIENT
main.110e172f1b5e7383.esm.js:2
```
